

A HARD SUMMER

On the ramp, we're used to severe weather, sweltering heat and irregular ops.

But this summer was different:

- Record loads.
- Catastrophic short staffing.
- Broken down equipment.

And the tragic death of a fellow ramp worker in JFK.

IT'S TIME TO STOP AND THINK.

Our safety is too important to be left to profit driven managers.

With an independent, employee led safety committee, we can take control of our own safety.

IT'S WHAT BEING UNION IS ALL ABOUT.
